

Members: Kiran Smelser, Elijah Jordan, Connor O'Neill

Each group member has thoroughly tested their respective matrix multiplication algorithms and uploaded all necessary files to GitHub. Based on the tests all the different matrix multiplication algorithms are working as expected. Our plan for the upcoming week is to slightly improve the runtime of a few of the matrix multiplication algorithms as well as gather all the information and figures needed for the presentation. Moreover, if time permits, we plan to begin working on the presentation towards the end of the week.
